

APPLICATIONS

- Irrigation
- Chemigation
- Agricultural automation
- Well usage monitoring

FEATURES

- Simple as a mechanical meter
- No moving parts
- Minimal straight pipe required
- Battery power standard; External power optional
- Solar compatible
- Built-in rate & total indicator
- Built-in pulse output for data-logging or telemetry
- Tamper-evident seal

GENERAL INFORMATION

The AG2000 is a spool-type electromagnetic flowmeter for use in irrigation applications in 4" to 8" pipe. With no moving parts, these meters have unobstructed flow and are resistant to wear from debris found in ground or surface water. There are no bearings or propeller to wear out. Minimal straight pipe requirements allow AG2000 meters to be used in piping configurations where there is little space between the meter and an elbow. In chemigation applications, the meter should be installed upstream of the injection line or enough downstream to allow thorough mixing of fluids before the meter (see Tech Bulletin on SeaMetrics website Downloads page).

The standard AG2000 is battery powered. Where an external power source is available, the AG2000 can be optionally converted to 7-24 Vdc, with the batteries then serving as backup in case of power failure. This configuration will

prolong battery life indefinitely.

The meter comes with built-in pulse output (requires optional output cabling) for data logging or telemetry. Several pulse rates are available. The AG2000 is compatible with the SeaMetrics Data Logger available as a remote mount (DL75W) or secure meter mount (DL75AG). A SeaMetrics ET420W can be added if remote rate/total reading is desired, or an AO55W if a 4-20 mA (analog) signal is required.

The AG2000 has a seal wire to protect against unauthorized access. The seal can be broken to change units of measure, replace the battery pack, or to field-install a power/output cable. The optional cable can be factory- or field-installed for applications where external power is available and/or pulse output is needed.

FEATURES

SPECIFICATIONS

Pipe Sizes		4", 6", 8"		
Fittings		Flanges, ANSI 150 lb. drilling		
Pressure		150 psi (10.3 bar) working pressure		
Temperature Range		10°- 130° F (-12°- 54° C)		
Accuracy		+/-1% at 100% to 10% of reading; +/-2% at 10% of reading to cut off		
Materials	Body	Welded steel, epoxy-coated		
	Liner	Dual durometer rubber		
	Electronics Housing	Diecast aluminum, powder-coated		
	Electrodes	316 stainless steel		
Display	Rate	Total		
	Digits	6	8	
	Units	Gallons/Minute	Acre-Feet; Acre-Inch; Gallons x 1000; or Cubic Feet	
		Cubic Feet/Second	Cubic Feet	
		Cubic Feet/Minute	Acre-Feet	
		Liters/Second	Cubic Meters; or Megaliters	
		Liters/Minute	Cubic Meters	
		Cubic Meters/Minute	Cubic Meters	
Security		Cross-drilled screws and tamper-evident seal		
Power		2 Lithium 3.6V "D" batteries, replaceable, 5 year life		
		With external power option (uses 7-24 Vdc, 30 mA), Lithium batteries serve as backup in power failure (10 year life)		
Pulse Output (with optional cable)				
	Signal	Current sinking pulse, opto-isolated, 24 Vdc, 10 mA max		
	Pulse Rates	10 units/pulse (default); 1000 units/pulse; High Frequency (for details, refer to AG2000 High Frequency Output Technical Bulletin on our website)		
Empty Pipe Detection		Hardware/software, conductivity-based		
		NEMA 4X standard, short-term immersible option		

DIMENSIONS

AG2000

Meter Size	L		H		T		Shipping Weight	
	inch	mm	inch	mm	inch	mm	pounds	Kg
4"	10.24	260	7.0	178	.83	20.9	32	14.5
6"	12.27	312	8.1	206	.92	23.3	47	21.3
8"	14.24	362	9.1	231	.92	23.3	71	32.2
Flanges	Standard ANSI 150 lb. drilling						Cable 1 lb.	

STRAIGHT PIPE RECOMMENDATIONS

(X = pipe diameter)

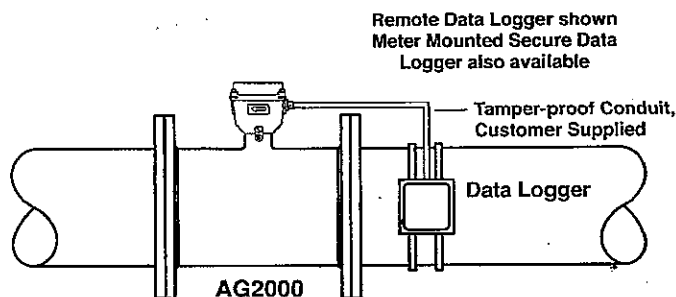

Minimal straight pipe
required between elbows.
For other piping configurations,
consult factory.

FLOW RANGE

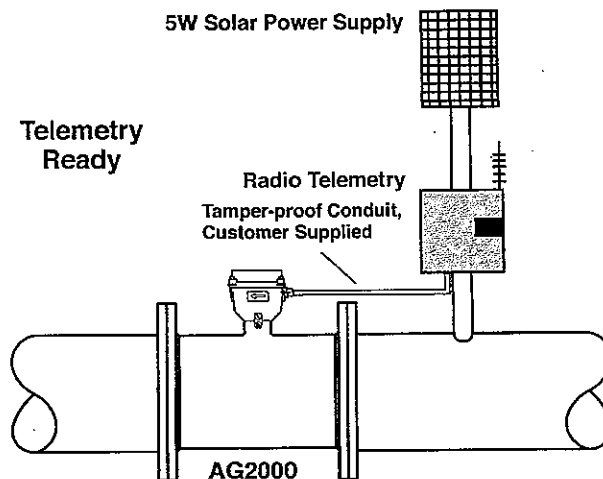

Flow Range	4"		6"		8"	
	Gal/Min	Liter/Sec	Gal/Min	Liter/Sec	Gal/Min	Liter/Sec
Minimum	12	.75	32	2	60	3.8
Maximum	500	31.5	1,200	75.7	2,200	138.8

OUTPUT CAPABILITIES

Data Logger Compatible

Telemetry Ready
